

# Explore Your Environmental Science Career

July 27 - August 1, 2026

Open to rising 6<sup>th</sup> - 8<sup>th</sup> grade students

Join the Blue Hill Observatory and partners for a week-long summer experience where you will explore STEM careers connected to weather, climate, and the environment. Work with STEM experts, investigate real-world challenges, and present solution-oriented projects to professionals in the field. Meet likeminded students and share your passions and interests of the outdoors and STEM during this intensive experience.

**Middle Schoolers: Spend your summer working on innovative solutions to real-world problems alongside peers and professionals**

## More Information

- Cost: \$650 for 6 day program
- Students submit an application sharing a brief description of their interest in STEM careers and what they hope to get out of the program
- Applications are accepted on a rolling basis. Final deadline is May 1, 2026
- A \$100 deposit is due to accept your spot

**Do you have an interest in working in careers that address these issues?**

- Climate & weather science
- Environmental science & ecology
- Engineering & technology
- Biodiversity or sustainability
- Data science & GIS
