

Summer 2026

LAUNCH YOUR METEOROLOGY CAREER PROGRAM

July 13 - 18, 2026

Open to rising 8th graders - college freshman

This intensive week-long program is for aspiring meteorologists and those hoping to study meteorology or atmospheric sciences. Students experience an immersive understanding of meteorology through on-site discourse and field trips, learn to accurately observe and forecast the weather, examine proven broadcasting techniques from local meteorologists, and prepare and record a personal forecast. Learners explore different careers in meteorology from researchers to broadcast meteorologists to weather observers and more. Students work one on one and in small groups with veteran meteorologist, Tim Kelley.

Details

- Cost: \$850 for 6 day program + lunch daily
- Students submit an application with a 1-page essay outlining their interest in the program
- Applications are accepted on a rolling basis
- A \$150 deposit is due to accept your spot
- Final application deadline is May 1, 2026
- Scholarships may be available for those who apply (more information in the application)
- Applications open January 5 on our [website](#)

All participants will:

- Receive individualized guidance from Tim Kelley, including making a weather forecast for your birthday
- Experience an immersive understanding of meteorology through on-site discourse and field trips
- Learn to accurately observe and forecast the weather
- Examine proven broadcasting techniques from local meteorologists
