

# WEATHER & TRAIL EXPLORER PROGRAM

## School Breaks

February 17 - 20 & April 21 - 24, 2026

8:30 am - 3:00pm

Over these four days, students explore nature in the Blue Hills while learning about weather and climate and their longstanding impact on the environment. Students start their day on a hike, make observations about the natural world, collect daily weather data, create weather instruments and use their creativity to draw and document different aspects of Great Blue Hill. Students will learn from real Weather Observers 635 feet above sea level.

- **Open to students ages 7 - 12**
- \$390 for 4 days
- There are a limited number of spots, so reserve your child's spot today

## Activities Include

- Daily hike up and down Great Blue Hill
- Making and using weather instruments, including kites
- Art in the forest
- Trail maintenance and beautification
- A scavenger hunt through the forest
- Daily weather data collection
